## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following invention is required under 35 U.S.C 121:
  - A. Claims 1-18 are drawn to a method for communicating information between a plurality of local area network sections having different transmission speeds, classified in **class 709, subclass 233**.
  - B. Claims 19-20 are drawn to an arrangement for switching between a plurality of hubs, classified in **class 370, subclass 401**.
2. Inventions A and B are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention A has separate utility such as a method for communicating information between a plurality of local area network sections having different transmission speeds, classified in a *different Class/Subclass*. Invention B has separate utility such as an arrangement for switching between a plurality of hubs, classified in a *different Class/Subclass*. See MPEP 806.05(d).
3. The inventions are distinct, each from the other because of the following reasons:
  - (a) these inventions have acquired a separate status in the art as shown by their difference classifications.

Art Unit: 2143

(b) the search required for each Group is different and not co-extensive for examination purposes.

For example, the searches for the two inventions would not be the co-extensive because these Groups would require different searches on PTO's classification class and subclass as following:

The Group A search (claims 1-18) would require use of search **class 709, subclass 233** (not required for the invention B).

The Group B search (claims 19-20) would require use of search **class 370, subclass 401** (not required for the invention A).

For the reasons above restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17 (h).
